## **DETAILED ACTION**

### ***Inventorship***

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Adler et al (EP 0 556 942).

Adler et al teach the engine output error being defined as a difference between the desired engine output and a determined engine output; and adjusting at least

one engine parameter to reduce the error when at least one predetermined engine output condition is met.

3. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Tumback et al (2006/0102393).

Tumback et al teach the engine output error being defined as a difference between the desired engine output and a determined engine output; and adjusting at least one engine parameter to reduce the error when at least one predetermined engine output condition is met (see [0014] – [0018]).

4. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Tamai et al (6,823,840).

Tamai et al teach the engine output error being defined as a difference between the desired engine output and a determined engine output; and adjusting at least one engine parameter to reduce the error when at least one predetermined engine output condition is met.
